Professional Summary

Aspiring front-end web developer with hands-on experience building responsive, multi-page websites and delivering a paid client website with editable content through Decap CMS. Developing practical skills in HTML, CSS, JavaScript, responsive design, and WordPress, supported by an information technology education and strong troubleshooting experience. Focused on creating accessible, useful websites that solve real user and business needs.

Experience

Doleese Bros | Delivery Driver | August 2021–Present

- Resolve delivery and logistical problems in real time while maintaining accurate service
- Manage time-sensitive routes in a fast-paced, schedule-driven environment
- Communicate clearly with customers and team members to complete deliveries efficiently

Brown Transportation | Delivery Driver | September 2019–May 2021

- Completed time-sensitive deliveries while maintaining safety and operational standards
- Adapted to changing routes, schedules, and conditions using independent judgment

Education

Bachelor of Science in Information Technology

Full Sail University | Anticipated February, 2027

Associate of Science in Information Technology

Full Sail University | Graduated September 2025

GPA - 3.97

Technical Skills

- Front-End: HTML, CSS, responsive design, Flexbox, CSS Grid
- JavaScript: Fundamentals and basic interactivity
- Content Management: Decap CMS; WordPress and LocalWP in development
- Development Tools: Visual Studio Code, Git, GitHub, Chrome Developer Tools
- Workflow: Local development servers, responsive testing, debugging, image optimization

Projects

Scapelift Property Management Website | scapeliftpm.com

- Built and delivered a responsive client website using HTML, CSS, and JavaScript
- Integrated Decap CMS with GitHub authentication so authorized users can update website content
- Optimized image loading and galleries, reducing total image transfer from approximately 37 MiB to 13 MiB

Web Development Portfolio | In Development

- Designing and coding a responsive, multi-page portfolio using semantic HTML and shared CSS
- Built reusable navigation, project cards, skill cards, responsive Grid layouts, and accessible external links
- Testing locally across desktop and narrow screen sizes while debugging HTML structure, links, and CSS behavior
