**PROFILE**

IT support technician with hands-on Linux, virtualization, networking, storage, and troubleshooting experience gained through academic engineering projects and a Proxmox-based home lab. Skilled at diagnosing issues, collecting logs, editing configuration files, documenting solutions, and supporting users through clear communication developed in fast-paced customer environments. Currently have an Associate's in IT and completing a Bachelor's in IT and seeking a Linux-focused support role where strong troubleshooting fundamentals, curiosity, and continuous learning are valued.

**TECHNICAL SKILLS**

- **Linux & Systems**
  - Linux (Ubuntu, Debian), Proxmox VE, virtual machines, systemd, service troubleshooting, log collection, configuration file editing, SSH, NFS, storage & backups
- **Networking**
  - DNS troubleshooting, firewall basics, network mounts, remote access (WireGuard), Cloudflare Tunnel, reverse proxying (Caddy)
- **Cloud & Virtualization**
  - AWS EC2, HAProxy, Apache, MariaDB, virtualization concepts, provisioning, monitoring, orchestration fundamentals
- **Programming & Tools**
  - Bash fundamentals, Git, GitHub, command-line workflows, HTML, CSS, JavaScript, technical documentation
- **Monitoring & Automation**
  - Prometheus, Grafana, Ansible fundamentals

**ACADEMIC ENGINEERING EXPERIENCE**

**AWS Three Tier Document Management System | Full Sail University Capstone**

- Deployed SeedDMS across multiple Amazon Linux application servers backed by a separate MariaDB instance.
- Configured HAProxy for load balancing, HTTPS termination, session persistence, and backend health checks.
- Created reusable server images and documented architecture, setup, risks, and verification steps for a non-technical audience.

**TECHNICAL PROJECTS**

**Patrick Home Lab | Proxmox and Linux Infrastructure**

- Operate Linux virtual machines providing media services, NFS storage, secure remote access, reverse proxying, monitoring, and Ansible-based administration.
- Troubleshoot VM, network, DNS, mount, and service failures using Linux command-line tools.
- Integrate and migrate storage (8 TB → 12 TB), update persistent mounts and NFS exports, and verify service access after changes.
- Document changes, troubleshooting steps, and validation procedures.

**Command Atlas | Command Reference Application**

- Developed a searchable desktop reference of 8,000+ AWS, Windows, PowerShell, Linux, and platform commands.
- Improved search behavior through debugging and automated tests.

**PROFESSIONAL EXPERIENCE**

**Delivery Driver | Dolese Bros.  | August 2021–Present**

- Resolve delivery, scheduling, and customer issues in real time while maintaining safety, accuracy, and deadlines.
- Communicate clearly with customers, dispatchers, and team members in fast-paced environments.

**Delivery Driver | Brown Transportation | September 2019–May 2021**

- Completed time-sensitive assignments, adapted to changing routes and customer needs, and maintained operational standards.

**EDUCATION**

Bachelor of Science in Information Technology | Full Sail University | Expected March 2027

Associate of Science in Information Technology | Full Sail University | September 2025
